Lucas Román Fernández

Technology Analyst | SAP S/4HANA | Computer Engineering Student

Buenos Aires, Argentina | lukychillcontacto@gmail.com | linkedin.com/in/Lukychill | github.com/LukychillGitHub | lukychill.com

SUMMARY

Technology Analyst in the Systems area at Molinos Río de la Plata, focused on SAP S/4HANA. I specialize in incident analysis and resolution: I map the business process, review system data, documents and configuration, and analyze ABAP code until I find the root cause. I took part in integrating companies acquired by Molinos into SAP. Computer Engineering student (Universidad del Salvador, GPA 9.23/10), aiming to grow within the SAP ecosystem and in systems engineering.

EXPERIENCE

Molinos Río de la Plata · Technology Analyst, Systems — Feb 2026 – Present

- Analyze and resolve SAP S/4HANA incidents in accounting processes (FI module) and purchasing, materials and invoicing flows: reproduce the issue, review data and documents, isolate the root cause and validate the fix with the user.
- Debug ABAP code (programs, function modules and classes) to find logic failures. Among other cases, fixed compound tax postings to G/L accounts, the credit memo flow with an alternative payee and unit-of-measure conversion in invoices created through an API integration.
- Integrated data from the acquired companies Bodegas Etchart, NotCo and Complejo Alimenticio San Salvador into SAP S/4HANA with SAP Migration Cockpit (LTMC/LTMOM): customers, vendors, materials, stock, batches and production versions.
- Ran the full cycle of each migration: template design, data cleansing and validation, QA test loads, production load and audit-ready documentation of the evidence.
- Manage system changes through functional specifications and transport requests, coordinating with business users, master data, logistics (EWM), development and external consultants.
- Took the initiative to run the weekly incident follow-up with the external consulting firm, setting priorities until each case was closed.

Colegio Secundario Carlos Maschwitz · Computer Science Teacher — Aug 2023 – Jan 2026

- Taught Office, flowcharts, logic gates and hardware fundamentals to high school students, translating technical concepts into plain language.

Lukychill (personal brand) · Content Creator — Mar 2020 – Present

- Built a community of 550,000+ followers across TikTok, YouTube, Twitch and Instagram, with videos reaching up to 5.9 million views and 10M+ likes on TikTok.
- Handle the entire production: concept and script, on-camera work, editing (CapCut, Photoshop) and live streaming (OBS).
- Have published consistently for more than five years, using reach and engagement metrics to refine formats, and closed collaborations with gaming brands.

Ford Argentina · Quality Intern, PUMA engines — Mar 2022 – Nov 2022

- Designed 3D-printed fixtures that optimized the production line and improved quality data traceability in Excel.

PERSONAL PROJECTS

Automated video republishing bot — Python · APIs · OAuth 2.0 · Linux

- Publishes the same video to Google Drive, YouTube and Instagram from a single link. Integrates four APIs with OAuth 2.0 and runs 24/7 on a Linux server I administer.

PassportPlanner — React Native · TypeScript · Supabase

- Published multi-user mobile app to plan shared activities, with authentication, a PostgreSQL database and automated deployment with GitHub Actions.

EDUCATION

Universidad del Salvador · B.S. in Computer Engineering · 22 of 49 courses completed · GPA 9.23/10 — 2024 – Present

E.T. Henry Ford · Electromechanical Technician · GPA 7.95/10 — 2015 – 2022

SKILLS & LANGUAGES

SAP	SAP S/4HANA (FI, purchasing and materials), SAP Migration Cockpit (LTMC/LTMOM), ABAP debugging, master data, functional specifications, transport requests, incident management
Analysis	Root cause analysis, business process mapping, systems analysis, data validation, technical documentation
Development	Python, TypeScript, JavaScript, SQL (MySQL, PostgreSQL), REST APIs, OAuth 2.0, Node.js, Git, Linux
Soft skills	Initiative to take on challenges, teamwork, communication with users, continuous learning
Languages & cert.	Spanish (native) · English (B2) · Excel Expert certification, UTN (82/100)
