Lucas Román Fernández

Technology Analyst | SAP S/4HANA (FI) | Data Migration | Foreign Trade

Buenos Aires, Argentina | lukychillcontacto@gmail.com | linkedin.com/in/Lukychill | github.com/LukychillGitHub | lukychill.com

SUMMARY

Technology Analyst on the Systems staff team at Molinos Río de la Plata, specialized in the SAP S/4HANA FI module. Responsible for data migration of the companies Molinos acquires and for resolving Foreign Trade incidents, including ABAP debugging. I lead the weekly incident meeting with the external consulting firm and build automations with Python and TypeScript. Computer Engineering student (Universidad del Salvador, GPA 9.23/10), growing toward an SAP Functional Consultant role.

EXPERIENCE

Molinos Río de la Plata · Technology Analyst, Systems staff team (FI) — Feb 2026 – Present

- Own the SAP Migration Cockpit (LTMC/LTMOM) loads for the integration of three acquired companies, Bodegas Etchart, NotCo and Complejo Alimenticio San Salvador: customers, vendors, materials, stock, batches and production versions. Next: Grupo Ayudín.
- Run the full migration cycle: templates, data cleansing, QA test loads, production load, business validation and audit-ready documentation.
- Lead the weekly Foreign Trade incident meeting with the external consulting firm and diagnose issues end to end through ABAP debugging (SE38, SE37, SE24); for example, fixed compound tax postings to G/L accounts and the credit memo flow with an alternative payee.

Colegio Secundario Carlos Maschwitz · Computer Science Teacher — Aug 2023 – Jan 2026

- Taught Office (Word, Excel, PowerPoint), flowcharts, logic gates and hardware fundamentals to high school students, translating technical concepts into plain language.

Lukychill (personal brand) · Content Creator — Mar 2020 – Present

- Rocket League gaming community (Grand Champion) with 390K+ TikTok followers and presence on YouTube, Instagram, Twitch and Kick; metrics analysis and brand collaborations with Repeat.gg and Aoeah.

Ford Argentina · Quality Intern, PUMA engines — Mar 2022 – Nov 2022

- Designed and built 3D-printed fixtures that optimized production line processes, and improved quality data traceability in Excel.

PROJECTS

Automated video republishing bot — Python · OAuth 2.0 · Linux · nginx

- Built a Telegram bot that takes a TikTok link, downloads the video in HD without watermark, validates its length, stores it in Google Drive and publishes it as a YouTube Short and an Instagram Reel. Runs 24/7 on a Linux VPS I administer.
- Integrated 4 APIs (Google Drive, YouTube Data v3, Instagram Graph API and a download service) with OAuth 2.0, long-lived tokens and per-platform fault tolerance.
- Diagnosed that TikTok withheld video data from datacenter IPs by inspecting the returned HTML, and replaced the extraction strategy.
- Deployed to production with systemd, nginx, HTTPS via Let's Encrypt and a non-privileged user.

PassportPlanner, multi-user mobile app — React Native · Expo · TypeScript · Supabase

- Shipped app to plan shared activities (invite-based passports, photos, rankings, push notifications) with a Supabase backend (auth, PostgreSQL, storage, Edge Functions) and CI/CD on GitHub Actions; web version at lukychillgithub.github.io/PassportPlanner.

EDUCATION

Universidad del Salvador · B.S. in Computer Engineering — 2024 – Present

22 of 49 courses completed · GPA 9.23/10

Escuela Técnica Henry Ford · Electromechanical Technician (technical high school) — 2015 – 2022

GPA 7.95/10

SKILLS

SAP & business	SAP S/4HANA (FI), SAP Migration Cockpit (LTMC/LTMOM), master data migration, ABAP debugging, SE16N, ME23N, FB03, MM03, BMBC, PA30, SLG1, transport requests, functional specifications, Foreign Trade
Development	Python (asyncio), TypeScript, JavaScript, React Native, Next.js, Node.js, Supabase, PostgreSQL, SQL/MySQL, REST APIs, OAuth 2.0
Infrastructure	Linux, systemd, nginx, HTTPS/Let's Encrypt, GitHub Actions (CI/CD), Git, Advanced Excel

LANGUAGES & CERTIFICATIONS

Languages	Spanish (native) · English (B2) · Excel Expert certification, UTN (82/100)
